ERICKSON'S SEED STORE

R. H. ERICKSON, Prop.

Northern Grown Seeds

4170 WASHINGTON AVENUE NORTH
MINNEAPOLIS 12, MINN.

STORE: HYLAND 7424

Dear Friends:

IN presenting our annual seed catalog for 1953 may we express our sincere thanks for your patronage during the past year.

Supplying the Market Gardeners with the newest and very best strains available is our specialty. We are always on the lookout for better strains, and if we find any, we spare no expense in securing such stock. Quality seed of highest possible germination is our first consideration.

Our aim in preparing this catalog is to furnish a brief description of our stock to benefit you in selecting the varieties most suitable for your particular needs.

Prices listed herein are net and are the lowest possible for first class seed. We do not aim to compete with prices of low quality seed. We will be glad to quote prices on quantities larger than those listed in our catalog.

We pay all postal charges on vegetable and flower seeds and there is no additional charge for bags.

At your earliest convenience stop in our store and discuss your needs with us, or mail your order in promptly so that we may be in a better position to supply you with all the varieties needed.

We wish for you that this coming year be a very happy and profitable one.

Sincerely,

ERICKSON'S SEED STORE

Roy H. Erickson.

OUR GUARANTEE

Even with the highest quality of seeds and bulbs, success in gardening depends largely upon soil, cultivation and weather conditions. Therefore, we give no warranty, express or implied, as to the productiveness of any seeds, bulbs, or other items we sell, and we will not in any way be responsible for the crop. We are willing to refund money paid for the seeds or bulbs if they are not as represented. In all instances our liability is limited to the actual cost of the seeds or bulbs sold by Erickson's Seed Store.

ASPARAGUS

From Seeds. To raise asparagus from seed the seed should be sown early in the spring. One ounce of seed will sow 75 feet of row and produce about 250 plants. The plants should be set in the permanent bed when one or two years old.

	Oz.	¼-lb.	Lb.
Washington, Mary. An improvement over the original Washington, being earlier, larger, fully as rust resistant. The long, heavy stalks have closely folded tips which do not sprangle out prematurely20	.60	2.00

BROCCOLI

Italian Green Sprouting. Our strain is the true green sprouting type as introduced by the Italian gardeners and rapidly becoming popular40	.90	2.25
---	-----	-----	------

BEANS

DWARF YELLOW VARIETIES

Culture—Beans may be planted any time from May 1st to August 1st. They do not require very fertile soil, thriving well on light loam. Sow 1 pound to 100 feet of drill, or 60 pounds per acre. Rows may be from 2 to 3 feet apart, the beans 2 to 3 inches apart and 1 to 2 inches deep. A succession of plantings every two weeks will provide a constant supply of fresh beans for the table.

	Lb.	15 Lbs.	60 Lbs.
Unrivald Wax. 53 days. Extremely prolific home and market garden sort. Plant medium large, thrifty, resistant. Pods attractive clear yellow; 5½ in. long, about ¾ in. wide, flat but fleshy; brittle, stringless and tender. Seeds small, glossy yellowish-brown50	5.75	22.20
Pencil Pod Black Wax. We consider this the best round pod wax bean both for home use and market. The pods are 6 to 7 inches long, straight and as round as a pencil. The pods are clear yellow in color, very brittle, 52 days.....	.50	5.75	22.20
Round Pod Kidney Wax. Also known as Brittle Wax, 55 days. Especially valuable for the home garden as well as for canning; very fleshy, brittle, strictly stringless.....	.50	5.75	22.20

DWARF GREEN PODDED SORTS

	Lb.	15 Lbs.	60 Lbs.
Logan. 52 days. A new hardy Tendergreen Type Bean. Resembles Tendergreen except that it is highly resistant to common bean Mosaic, powdery mildew and seems to possess more tolerance to bacterial blight. Hardier and more productive than Tendergreen. Pods are dark green, stringless and fleshy. Length is 6 to 6½ inches. Shape is round, slightly curved with a straight back.....	\$0.50	\$5.75	\$22.20
Asgrow Stringless Valentine. This is a recent improvement over the old Black Valentine, is both early and stringless. The pods are round, fleshy, slightly curved, and of very fine quality. It is a heavy yielding variety.....	.50	5.75	22.20

BEANS (Cont.)

	Lb.	15 Lbs.	60 Lbs.
Tendergreen. One of the very best of the round, green podded beans. Fleshly pods about 6 in. long, stringless, very productive and closely resembles an improved Full Measure....	.50	5.75	22.20
Plentiful. A new introduction. All America Award 1939 Green flat-podded bush bean an improved, very productive variety of the Bountiful type. Long, straight, medium deep green pods, brittle, stringless and of distinctive flavor. Notably resistant to common rust. 49 days.....	.50	5.75	22.20
Bountiful. The most popular green podded bean among market gardeners. The pods are long, flat, slightly curved and absolutely stringless. Bountiful is an early variety maturing in about 45 days.....	.50	5.75	22.20
Giant Stringless Green Pod. Plants are 16 to 20 inches tall, upright with large medium green leaves. The pods are 6 inches long, round, light green, fleshy, straight to slightly curved and stringless. 53 days.....	.50	5.75	22.20
Topcrop. A new introduction by Dr. Wm. Zaumeyer of the U. S. Dept. of Argiculture. Resistant to common bean mosaic. The pods are 6½ inches long, round, very slender and straight when young. Very productive. 48 days.....	.50	5.75	22.20

BUSH LIMA BEANS

Culture—Bush limas should be planted in rows three feet apart, placing two or three beans 15 inches apart in the row, and covering an inch deep. A pound is sufficient for about 100 feet of row. Should not be planted until the ground is warm.

	1 Lb.	15 Lbs.
Fordhook Bush. A most excellent, early and distinct variety and exceedingly popular with market gardeners. Pods about 5 in. long, containing 4 to 5 large, oval-shaped, very thick white beans of the so-called Potato Lima type.....	\$0.50	\$5.70
Henderson's Bush Lima. Old stand-by variety of baby lima. Pods are flat, straight to slightly curved, 2¾ in. long, ¾ in. wide, with 3 to 4 flattish, green, small beans turning creamy white when dry.....	.50	5.70

POLE OR RUNNING BEANS

Kentucky Wonder. The best early green-podded Pole Bean for home or market garden. Vigorous and productive; of fine quality.....	.50
Scarlet Runner. This well-known variety grows about 10 feet high, bearing large sprays of bright scarlet pea-like flowers which are very ornamental50

We Recommend VIGORO, the Complete Plant Food, to All Home Gardeners!

Beets—No. 1 Perfected Detroit. No. 2 Asgrow Early Wonder.
No. 3 Boston Crosby. No. 4 Green Top Bunching.

TABLE BEET

Culture—A rich, sandy loam will give best results with table beets. Sow the seed in the early spring in rows 12 to 14 in. apart and when about 2 in. high, thin to 3 in. apart. For winter use, sow from July 1st to August 10th. One ounce of seed will sow 100 feet of drill; 8 pounds per acre.

	Oz.	¼ Lb.	Lb.
Green Top Bunching. Early, extremely attractive bunching beet, tops medium sized and erect, foliage clean, grayish-green that does not turn red or brown in fall. Roots round, smooth and glossy, slightly flattened when mature; flesh bright blood red. 60 days.....	\$0.15	\$0.40	\$1.35
Boston Crosby. This is a distinctly superior early variety, of which we are very proud. It is as early as Early Wonder, has a deeper shape, a medium sized top and cuts a darker red than any early beet we have seen.....	.15	.40	1.35
Perfected Detroit. Superior to any variety yet introduced. Comes 95% true to exactly the same shade of dark red color and does not show any white rings. Tops are medium and their close, compact attachment leaves a larger portion of the root edible. Roots are globular, very smooth and uniform..	.15	.40	1.35
ASGROW EARLY WONDER. Unsurpassed in earliness, uniformity, and in depth of interior color. Tops small, erect, slender. Roots semi-globular, deep red, smooth, with small neck and tap root. Flesh purplish red with zones of slightly lighter shade; tender and of excellent quality.....	.15	.40	1.35
BEET FOR GREENS10	.30	1.10

Our Selected Beets are grown from selected roots. They cost much more to produce and are worth much more than less carefully grown seeds.

Golden
Tankard

Mammoth
Long Red

MANGEL WURZEL

FOR STOCK FEEDING

	Oz.	¼ Lb.	1 Lb.
Mammoth Long Red, or Norbiton Giant. This variety has produced the largest yield of any kind of mangel. The quality of the roots for feeding is high. The roots grow very large and keep well. They are quite long, light red in color and grow well out of the ground so are easily harvested.....	\$0.15	\$0.35	\$1.15
Improved Golden Tankard. We recommend it as the best Mangel by far for dairy farmers. It combines apparently all the fine points possible to condense into a Mangel. The color is a deep rich yellow. The flesh is firm and solid.....	.15	.35	1.15

SWISS CHARD

Fordhook Giant. We consider this new variety one of the best Swiss Chards. The leaves are dark green, very large, much curled or "Savoyed," thick of texture and tender. The stems are pure white, broad and thick and make excellent greens when cooled separately.....	.15	.40
---	-----	-----	------

LEEK

Large American Flag. The most popular variety; grows to a good size, and is straight and uniform, and is of the best quality50	1.60
---	-----	------	------

VIGORO, the Complete Plant Food, Supplies All Plants 11 Vital Elements!

Cabbage—Danish Ball Head; Wisconsin Hollander; Golden Acre No. 3.

HIGH BRED DANISH GROWN CABBAGE SEED

One ounce of seed will produce 1000 to 2000 plants sown in open ground, or 3000 if sown in frames. It requires 4 to 6 ounces of seed to produce plants for an acre of ground.

Methods of Culture. To get very early cabbage in the Northern states the seed should be sown in hot beds in February or March, or about six weeks before the ground outside is ready to receive the plants.

NEW EARLY CABBAGE

	Oz.	¼ Lb.	1 Lb.
Golden Acre. Every market grower knows that this fine cabbage is one of the most profitable varieties to grow. This strain which we offer is the true originators stock that we have sold for years and is much superior to most stocks sold even at much higher price.....	\$0.35	\$1.00	\$3.00
Golden Acre Special Yellows Resistant. This finely bred strain of Golden Acre is, we believe, the most perfect strain of early cabbage in existence. This is the stock for the grower who wants absolutely the best and is willing to pay the little extra cost for seed which actually amounts to only about 85c per acre.....	.45	1.35	4.50
Copenhagen Market. The earliest large round-headed cabbage yet introduced. Matures 68 days after transplanting. It is very sure heading and uniform variety of hardy and compact growth40	1.25	4.00
MARION MARKET. Yellows Resistant Copenhagen Type. This is the best of the early round head resistant varieties. The heads resemble Copenhagen Market in shape and mature about the same time.....	.45	1.35	4.50
Improved Globe. 75 days. Selected from Glory of Enkhuizen. A fine Mid-Season, Round head type, maturing a few days later than Marion Market. The heads are globular, very compact, small core. Plant and head type are very uniform, heavy yielder; widely used for kraut as well as for shipping. 95 to 100% Resistant.....	.50	1.50	5.00

CABBAGE (Cont.)

LATE VARIETIES

	Oz.	¼ Lb.	1 Lb.
Wisconsin Ballhead Short Stem. 90 days. A yellows resistant Danish Ballhead developed for early fall shipping in the North. Very uniform in type and maturity. Plant 12 to 16 inches tall, upright, bluish-green leaves, short stem. Heads 6 to 7 inches in diameter, weight 6 to 7 pounds, round, solid and compact with slightly flattened top.....	.60	1.75	5.50
Danish Ballhead, Short Stemmed. This is the heaviest yielding strain. Crops of 22 tons per acre are not uncommon. The heads are large, very solid, somewhat flattened, and of good deep green color. Under good average conditions this is probably the most profitable Danish cabbage to raise. 105 days40	1.25	4.00
Ferry's Hollander. A strain of the Danish Ballhead type. Sure heading, very solid and one of the very best keepers. The heads are medium sized, round, exceptionally solid and stand shipment better than any other late sort. This is the pure strain of Ferry's own growing and no substitute. 120 days			Crop failure
Wisconsin Hollander. This variety has been bred for resistance to the Cabbage Yellows and is valuable where the cabbage crop is likely to suffer from this disease. The round heads are large, spreading, and remarkably solid. We have a fine strain of this. 100 days.....	.40	1.25	4.00
Late Flat Dutch. A low growing variety, heads large, bluish green, round, solid, broad and flat on top. An excellent fall and winter keeping variety. 98 days.....	.35	1.10	4.00
Savoy Cabbage, Perfection Drumhead. Savoy cabbage is of much finer quality than ordinary cabbage and should therefore be raised more generally than it is. 98 days....	.35	1.10	4.00

RED VARIETIES

Round Red Dutch. Plants small, compact and short stemmed; heads of medium size, round, very hard and deep red; uniform in shape and color.....	.50	1.50	5.00
The Mammoth Rock Red is the largest of the red varieties and the seed we offer produces fine, large, solid heads of good color and practically every plant will produce a good head under favorable conditions. 100 days.....	.50	1.50	5.00

CHINESE CABBAGE

Chihli. Early and very sure heading. Head becomes 18-20 in. tall, 3½-4 in. thick, tapered near tip, very firm, well blanched, crisp, tender, and sweet. Superior to Chinese Improved or Pe Tsal.....	.30	.90	3.00
---	-----	-----	------

**This is the original shape of our Greater Chantenay Carrot. Color deep orange.
Very smooth and longer than the old strain.**

CARROT

Culture—Like other root crops, the carrot likes a rich sandy loam, well filled. For early crops, sow as soon as the ground can be tilled, say in April or early May. For late crops, sow in late June or July. Sow the seed $\frac{1}{3}$ inch deep in drills 22 in. apart, thinning to three in. in the row. Carrot is slow to germinate and the soil must therefore be well firmed. One ounce for 300 feet of row; 2 pounds per acre.

	Oz.	$\frac{1}{4}$ Lb.	1 Lb
Greater Chantenay —This is a recent development from the old Chantenay, and is 1 to 2 inches longer, in line with popular demand for longer carrots of recent years. It is smooth, with strong top, and resembles Chantenay in other respects....	\$0.20	\$0.65	\$1.90

Selected Danvers. This is a very fancy selection of the old Danvers Half Long. It is only slightly stump-rooted, tapering more than Chantenay. Matures in about 78 days, being therefore about ten days later than Chantenay. This strain has proven to be a heavy yielder and makes a fine main crop sort. It is smaller in diameter than Chantenay.....	.20	.60	1.75
--	-----	-----	------

Coreless or
Nantes No. 3

Red Cored
Danvers No. 4

Imperator No. 5

CARROT (Cont.)

	Oz.	¼ Lb.	1 Lb.
Coreless or Nantes. A very fine variety for table use. The carrots are very tender, of mild pleasant flavor, and without any hard core as in some varieties. The shape is ideal for a table carrot being practically the same size from crown to bottom. The tops are small and the carrots mature early. 75 days	\$0.20	\$0.65	\$1.90
Red Cored Danvers. 75 days. An improved strain of Danvers. Root longer, slimmer and more refined than old strain. Flesh deep orange with small indistinct core. Excellent quality, adapted for market and home garden.....	.20	.60	1.75
Imperator—Improved Long Type. Top stronger than regular Imperator. Roots 9 to 11 inches long by 1½ inches wide at shoulder, tapering to a nearly pointed tip, smooth exterior and deep orange.....	.20	.65	1.90
MORSE'S BUNCHING. A long type carrot, developed to fill the demand for a longer and better bunching carrot. The tops are short and sparse. The stems are medium size and strong. The neck is quite small yet not too small and the tops are strong enough for a bunching carrot. The mature roots will reach 1½ to 2 inches in diameter by 8 inches long or better. The color, both exterior and interior, is a fine deep red. Cores are small and about the same red color as cortex. Roots are smooth, free from hair roots and wrinkles20	.65	1.90

SWEET CORN

1 Lb. 12 Lbs. 48 Lbs.

Golden Bantam. Since the introduction of the Golden Bantam sweet corn, many new and supposedly superior varieties have been introduced. We have tested a number of them and have yet to find one its equal in sweetness. 77 days... .45 3.60 14.00

Whipple's Yellow. Those who want a late yellow corn with large ears will find this one of the best. The ears are 7 to 8 in. long with 12 to 14 rows. They mature later than Golden Bantam so follow nicely after that variety. The quality is very fine. 84 days..... .45 3.60 14.00

Bantam Evergreen. 90 days. A cross between Golden Bantam and Stowell's Evergreen. Ears are 7 to 8 in. long with 12 to 14 rows of large yellow kernels which are of fine quality. Matures later than Whipple's Yellow and Golden Giant... .45 3.60 14.00

HYBRID SWEET CORN

High Quality Seneca "60." 62 days. A Seneca 60 with better eating quality and more uniform ears. Has the flavor and tenderness of the old Golden Bantam and makes a fine appearing 6 to 6½ inch ear, of 8 to 10 rows. The earliest hybrid sweet corn on the market..... .65 7.80 29.75

Seneca 60 × C13: 65 days. A new wilt resistant hybrid for those sections where bacterial wilt is prevalent. The 4½ to 5 foot stalk is a vigorous grower. Ears 6½ inches long, 10 to 14 rows of yellow kernels of fair quality. A larger ear than Seneca "60" and only a few days later..... .65 7.70 27.75

Golden Rocket (Hybrid 1018). A new early market gardener yellow Sweet Corn. It is primarily a ten to twelve row Corn and has a plant about five feet tall or better. The ear runs around 7½ inches in length and it is about six days earlier than Extra Early Golden Bantam. It is in the same maturity class as Seneca 60 but has considerable superior quality.. .65 6.20 23.50

Seneca Down. 65 days. A large eared extra early yellow hybrid stalks. 4½ to 5 feet. Strong, upright, ears well up from the ground. 6½ inches long, 12 to 14 rows. Medium yellow, fair quality kernels on large cob, heavy husk, gives good coverage to end of ear..... .65 6.80 26.40

Seneca Golden. 72 days. Stalks 5½ feet tall and produce two marketable ears on practically every stalk. Ears nearly as large as Golden Cross and well filled clear to the tip. Kernels rich golden yellow and if harvested when ready are of excellent quality65 7.70 29.75

ASK FOR PRICES ON LARGER QUANTITIES

HYBRID SWEET CORN (Cont.)

	1 Lb.	12 Lbs.	48 Lbs.
Kingscrost Single Cross Golden Bantam M.13. It is an extra early Hybrid developed from two inbreds taken from Golden Bantam types. The stalk is 4½ to 5 feet tall. Similar to Golden Bantam in appearance. The ear is practically all 8 rowed, slim, long. Averaging about 7 inches in length. The variety fills out well, making an attractive ear with a bright yellow color. 72 days.....	\$0.60	\$5.75	\$22.00
Kingscrost Golden Bantam 8 Row-G 7. This hybrid is from a week to ten days earlier than Bantam strains and has the true eight row Bantam ears. Its quality is excellent and is a favorite with market gardeners who prefer the true eight row Bantam type. Gardeners usually pick the entire crop for market at one picking. 77 days.....	.60	5.75	22.00
Earligold. Our newest hybrid, developed for critical market gardeners who want earliness, ear size, wilt-tolerance and improved quality in a first hybrid. Earligold matures in 72 to 75 days, it produces 12 to 16 rowed ears, 6½ to 7 inches long. Plants 5½ to 6 feet. Leaves medium to dark green. Heavy, well rooted stalk.....	.60	5.75	22.00
Hybrid 407. 82 days. Stalks 6 to 6½ feet tall, vigorous, suckers moderately. Ears 8 inches long, 12 rowed, slimmer, more cylindrical ear than Golden Cross. Quality, excellent. Especially adapted for whole ear frozen pack or canning whole ear. Also used for whole kernel pack by canners.....	.60	5.75	22.00
Golden Cross Bantam. 84 days. Developed by the Purdue Agricultural Experimental Station, and is about a week later than Golden Bantam. The ears are about 8 inches long and have 10 to 14 rows of kernels. This hybrid is noted especially for resistance to Stewart's disease and for the remarkable uniformity of its ears.....	.60	5.75	22.00
Tendergold. A very fine corn of outstanding quality. Four days earlier than open-pollinated Golden Bantam and generally twice as productive, the attractive 8-inch, 12-rowed ears command a premium on the market. For tenderness we have never seen its equal, and it holds this fine quality two or three days longer than other corns. Maturity, 75 days60	5.75	22.00

ASK FOR PRICES ON LARGER QUANTITIES

CAULIFLOWER

Cauliflower delights in a rich, moist soil, and in dry seasons should be abundantly watered, especially when heading. Sow the seed in the hotbed in January or February and transplant the plants 2 to 3 in. apart in another hotbed, until such time as they may safely be planted in the open ground.

	1 Oz.	2 Oz.	¼ Lb.
Snowdrift , called White Mountain, noted for its extremely large white heads. The plants are sturdy with large leaves that cover the heads exceptionally well, matures a little earlier than Snowball. This is a very reliable variety and is popular in many sections. We have a very true stock.....	\$2.00	\$3.50	\$6.50
Snowball No. 16. Plant dwarf and compact in growth with long upright leaves. Head 6½ inches in diameter, average weight 2 pounds, large, flattened pure white curds free from leaflets	2.00	3.50	6.50

CHOICE CELERY SEED

For the earliest crop sow in a hotbed during February or March. For the fall or main crop, seed may be sown in the open ground as early in the spring as the soil can be worked into good condition, and the plants should be set in the rows in July. Celery requires a rich, well-manured soil and plenty of moisture so that it can make a continuous growth.

	Oz.	¼ Lb.
Dwarf Golden, Self Blanching. American strain; our stock is reliable, solid, compact and large sized stalks, blanches a fine golden-yellow color	\$0.85	\$2.50
Giant Pascal. A green, home-garden variety, good for fall and winter storage. Plant large, stocky, with dark green leaves. Stalks long, broad, and solid; blanches to yellow-white.....	.85	2.50

CELERIAC

Large Smooth Turnip Rooted. The best there is. This vegetable deserves a wider recognition by growers or home gardeners. It is fine for flavoring soups or roots may be cooked up creamed.....	.75	2.65
---	-----	------

Cucumber—Cubbit No. 1; Straight-8 No. 2; Early Fortune No. 3; Picklers' Early Perfection No. 4.

PICKLING CUCUMBER

	Oz.	$\frac{1}{4}$ Lb.	1 Lb.
Picklers Perfection is a new cucumber, being the very earliest grown, having the same shape and color as the White Spine, only smaller in size. With early planting the gardeners will find this to bring more money for early slicing than any other, as it can be used until the White Spine is ready and still have the finest cucumber to be had for pickling.			
45 days	\$0.20	\$0.60	\$2.00
National Pickling. A selection or improvement of the snows, preferred by many commercial packers, original strain.			
50 days20	.60	2.00
Chicago Pickling. An early maturing, very small, dark green cucumber; cylindrical, square ended, and very popular with many growers who want an ideal bottle pickle. 52 days...			
	.20	.60	2.00
Mr 17. A mosaic resistant pickling cucumber developed at Ohio State University. It is slimmer and darker green than National, very productive. Vines are vigorous, dark green, large leaves. Fruit $6\frac{1}{2}$ to $7\frac{1}{2}$ inches long by $2\frac{1}{2}$ to 3 inches in diameter, tapering, well warted. Small seed cavity, black spine. 56 days.....			
	.25	.80	2.25
Early Fortune. 60 days. The finest type of White Spine yet produced. Early, very productive and disease-resistant; fruits nine inches long, slightly tapering; flesh white, very firm and crisp, with very few seeds; color rich, dark green			
	.20	.60	2.00

CUCUMBER (Cont.)

SLICING VARIETIES FOR OUTDOOR CULTURE

	Oz.	¼ Lb.	1 Lb.
Longfellow. An excellent, long, slender, dark green variety equally desirable for greenhouse forcing or out-door culture, and an ideal type for the private garden or as a "straight pack" variety for shipment to market. It measures 12 to 14 in. long and is fairly early. 60 days.....	\$0.25	\$0.65	\$2.25
Woodruff's Ace. 1936 introduction, a white-spined cucumber, intermediate between Hybrid and Longfellow. Has practically no white stripes or tipping and holds its color when shipped. Runs nearly 12 inches long. Not adapted to pickling. Outyields Longfellow by far and has few seeds.....	.25	.70	2.40
Cubit. All-American Bronze Medal 1944. Long, blunt-ended and cylindrical; a prolific, white-spined main crop variety, of smooth, crisp texture with small seed cavity, and admirably adapted for slicing. Holds its flesh quality well in shipping or at market25	.70	2.40
Colorado. Fruit very dark green, cylindrical, tapering at stem end with small seed area. One of the choicest varieties at present in cultivation, both for appearance and for slicing texture25	.70	2.40
Marketer. A new Asgrow variety. Vines very vigorous and prolific; fruits slightly tapered to each end, very dark green in color, notably uniform and trim in appearance; an attractive cucumber for the early market. 65 days....	.25	.70	2.40
Straight-8. Ideal in size, shape, and color. When in prime condition, it averages 8 inches long, is uniformly cylindrical, and possesses the desirable deep dark green color which it retains25	.70	2.40
A & C. Noted especially for its dark green color, which it holds very well; length 10 to 12 inches, slim and smooth; a fine slicer. 68 days.....	.25	.70	2.40
Niagara. This variety is the first slicing variety that is resistant to Cucumber Mosaic. In comparative trials Niagara shows the same plant vigor and large leaf construction that you find in hybrids. The fruit is white spined, shaped like Cubit, being blunt on the blossom end, is very dark green in color at picking stage and also through its development, very small seed cavity. The flesh is white, crisp, tender, and of excellent quality. The Cucumber varies from 7½ to 10 inches in length, being straight, cylindrical and of excellent dark green color. The vine is vigorous, the leaves much larger than normal varieties, and the plant stands up under adverse conditions better than normal varieties. It also has a good spring vigor, getting away fast in the spring and it has shown practically a total resistance to Cucumber Mosaic. It is in season with Cubit or Marketer..	.30	.85	2.90
	Pk.	1 Oz.	¼ Lb.
Early Surecrop, Hybrid (Fl). It is an All-American winner. The shape is similar to A & C or Cubit. It is in season with A & C; a few days earlier than Burpee's Hybrid. The color is very dark green. Hybrid Cucumber is as outstanding in performance as Hybrid corn when compared to open pollinated varieties. The Spring vigor, disease resistance, dark green foliage, increased yield and ability to produce over a long period makes it especially desirable.....	\$0.25	\$4.85	\$16.00

CUCUMBER (Cont.)

	Oz.	¼ Lb.	1 Lb.
Improved Long Green. For many years we have given this variety especial attention and have been able to offer a strain that is in a class by itself. The young fruits are ideal for chunk pickles and the large ripe fruits are much prized for sweet pickles. 72 days.....	.20	.60	\$2.00

Kohl
Rabi

Kohl Rabi

Egg Plant

EGG PLANT

Culture—Thrives in a rich, warm sandy soil. Start the seed in the hothouse, and transplant into boxes or small pots. Set out in the open after the middle of May, in rows three feet apart and two feet in the row.

	Oz.	¼ Lb.	1 Lb.
Black Beauty. Produces large egg shaped or bulbous fruit of fine color and quality. Has no spines, and is the earliest. Without doubt the most popular variety.....	\$0.80	\$2.75	\$8.50

OKRA or GUMBO

Perkins' Mammoth. This variety is about 3 feet high, very early and productive. Pods are deep green, very long, slender, slightly corrugated, very tender, and of good quality. A fine market variety	\$0.15	\$0.35	\$1.00
--	--------	--------	--------

ENDIVE

Green Curled, Green Ribbed. A variety with deeply cut leaf margins but not curled as is Moss Curled. It is medium large in size and blanches well at the heart in late summer and fall. The mid-ribs or stems are pure green.....	.15	.50	1.50
--	-----	-----	------

BRUSSELS SPROUTS

	Oz.	¼ Lb.	1 Lb.
Long Island Improved. Plant dwarf and compact; 20 in. tall; very uniform; stem well covered with firm, round cabbage-like balls of 1¼-1½ in. diameter which mature in succession	\$0.45	\$1.50

CRESS

True Water Cress. Requires a stream of running water, ditch or pond, in which it will grow without care, or a shady situation which should be liberally watered.....	\$1.00

KOHL RABI

Early White Vienna. A very fancy strain of the extra early short topped sort. This variety is considered the finest of all, either for forcing or for field use.....	.35	1.10	3.50
---	-----	------	------

KALE

Dwarf Curled Scotch. This is a very fine stock of the variety as usually sold. It is a low spreading type, with dark green curly leaves20	.50	1.75
--	-----	-----	------

AROMATIC AND SWEET HERBS

	Oz.	¼ Lb.	1 Lb.
Dill—Long Island Mammoth. This dill is much superior to the common dill, being larger and more productive.....	\$0.15	\$0.40	\$1.25
Sage. Leaves and tops are used for seasoning and stuffing, also for medicinal purposes.....	.50	1.75
Marjoram Sweet. Leaves and ends of the shoots are used for flavoring, both green and dried.....	.60	2.25
Thyme. Very largely used for flavoring. Will survive the winter if given a little protection.....	\$1.00
Summer Savory. Leaves and flowers flavor soups and dressings	\$0.50	\$1.75
Chives or Grass Onion. Very small hardy perennial grasslike Onion, of which the top is used for flavoring different dishes..	Pkt. 10c; Oz. 60c		

Grand Rapids

SUPERIOR LETTUCE SEED

	Oz.	$\frac{1}{4}$ Lb.	1 Lb.
Grand Rapids. Very early. Hardy, disease resistant; the most widely used and best adapted variety for greenhouse forcing. Plants large, upright, compact, and handsome; bright solid light green; leaves large, broad; margin much waved and frilled; very tender and sweet when grown under glass.	\$0.20	\$0.60	\$1.75
Black Seeded Simpson. Early. Dependable in all parts of America and widely grown in home and market gardens. Plant large, attractive, compact; broad, frilled light green leaves that are of fine crisp texture and splendid quality..	.20	.60	1.75
Prizehead. Medium sized plant composed of many curled leaves. The leaves are bright green, well bronzed at the edges. It is a fine home garden lettuce, grows quickly and has fine flavor20	.60
Salad Bowl. A new, slow bolting variety. Leaves are short and closely set, waved and notched. A head fills a salad bowl with a perfect rosette of rich green and very decorative leaves. 50 days.....	.60	1.75	6.00
Cos or Romaine, Paris White25	.65	2.00

LETTUCE

Heading Varieties

Great Lakes—w.s. All America winner developed by U. S. Dept. of Agric. in conjunction with Michigan State College. A sure heading variety with considerable resistance to tip burn. Heads are large, firm, outer leaves very dark green, blistered, well folded with tendency to heavy mid-rib. A favorite with home, market gardeners and long distance shippers because of its ability to head under adverse conditions. 82 days	\$0.55	\$1.60	\$5.20
---	--------	--------	--------

MUSKMELON or CANTALOUPE

Golden Osage Muskmelon

GROWING MUSK MELONS OR CANTALOUPE

Plant 3 lbs. per acre in drills or 1 lb. if hand planted in hills. The land should be a sandy loam, do not plant where cantaloupes were grown previously within three or four years

If planted in hills the rows should be 5 to 6 feet apart each way. Cross cultivating improves the yield, quality and earliness. Plant ten to twelve seeds to the hill about 2 inches deep and thin to one or two plants when they have 5 or 6 leaves. If drilled in rows 5 to 6 feet apart thin to one plant every 3 or 4 feet. Hoe carefully around the plants; keep free from weeds and cultivate often. We have found 8 or 10 cultivations at least should be given and more would be better.

Don't buy cheap seed. Your crop costs about fifty dollars per acre, and often more, considering rental of land, before you begin to pick, and poor seed may cut the value of the crop in two and even more. Four to six dollars per acre for the best seeds is small compared with other costs. Buy the best seed.

MUSK MELON (Cont.)

Iroquois

	Oz.	$\frac{1}{4}$ Lb.	1 Lb.
Iroquois. A fusarium resistant type introduced from New York State. It is of the Bender's Surprise Class being a large melon, fairly well netted, good thick orange flesh of excellent quality and appearance. It is recommended as being one of the best of the new introductions.....			
	\$0.25	\$0.75	\$2.25
Cornell Delicious No. 51. Similar to Sunrise or Delicious, but is resistant to fusarium wilt. A cross between Iroquois and Sunrise. The earliest wilt resistant Musk Melon. Excellent for home and market garden, but shell is not hard enough for shipping long distances. Fruit is 6 inches long by 5½ inches diameter, nearly round, flattened on ends, medium ribbing and well netted. Flesh bright salmon in color and excellent quality. 83 days.....			
	.50	1.40	4.75
Improved Strain Extra Early Sunrise. This melon with its fine qualities is rapidly becoming one of the most popular kinds. The flesh is moderately firm, deep orange and always sweet. If you want the best all around Musk Melon, either for the home garden or the market, plant the Improved Extra Early Sunrise.....			
	.20	.60	2.00
Craig. Excellent for the home garden or roadside trade. Uniform quality throughout a wide range of fruit sizes makes it a popular choice. Fruit 7½ inches long x 6½ inches diameter; distinct ribbing, very coarse netting; flesh very thick, firm with exceptionally deep salmon color, of delicious quality, sweet and spicy. 90 days.....			
	.25	.75	2.50

MUSK MELON (Cont.)

	Oz.	¼ Lb.	1 Lb.
Queen of Minnesota. A new excellent flavored Melon similar to Bender's Surprise, it is valuable especially for its extra hard shell, which makes it fine for shipping as they will stand up better than most varieties. It is deeply ribbed, well netted, covered with a grayish yellow skin, is beautiful yellow. Flesh is medium in grain, red salmon in color and the sweet tasty flavor calls for more. Weight 6 to 7 pounds.	\$0.25	\$0.65	\$2.25

Queen of Minnesota

	Oz.	¼ Lb.	1 Lb.
Sugar Rock. The melons are of medium size, as round as a ball and covered with heavy coarse netting. The fruit is of deep orange color, firm and of good thickness. The color of the melon is very light green turning when ripe to a light golden yellow. The melons ripen early and the vines are very productive. 83 days.....	.20	.60	2.00
Hales Best. A salmon fleshed Rocky Ford. A new and remarkably early melon of the Rocky Ford type, with very thick and finely flavored salmon flesh. The melons are oval, slightly ribbed, and heavily netted. It is a fine shipper and commands a good price. 80 days.....	.20	.60	2.00

MUSK MELON (Cont.)

Pride of Wisconsin

	Oz.	¼ Lb.	1 Lb.
Pride of Wisconsin. 88 days. A recent introduction which is selling in many sections. In appearance it most resembles Sugar Rock. Slightly oval, with a heavy coarse netting. It has very thick salmon flesh and a very small seed cavity. It is so full of sugar that it tends to split open if left on the ground after slipping from the vine.....	\$0.20	\$0.60	\$2.00

New Golden Osage. For a number of years this melon has been a consistent money maker for progressive growers. There is no muskmelon quite equal to the Golden Osage for attractive appearance, fine flavor, size and keeping qualities. But be sure of your seed.....	.20	.60	2.00
--	-----	-----	------

Bender's Surprise. Flesh is deep orange and very thick, of remarkably fine texture, and is very sweet and tender, notwithstanding its large size. The large, oval shaped, coarsely netted melons often weigh from 10 to 15 pounds each! Matures in 90 days.....	.20	.60	2.00

COLORADO GROWN WATERMELON SEEDS

Black Diamond (Florida Giant)

	Oz.	¼ Lb.	1 Lb.
Black Diamond (Florida Giant). Vines vigorous and very productive. Fruits dark green, large and nearly round. Flesh is firm and red and of excellent quality. Seed is tan with brown flecking. Nearly all the early melons you see in the stores are this variety.....	\$0.25	\$0.70	\$2.10
Blacklee. Bred for resistance to Fusarium wilt. Vines vigorous and very resistant to Fusarium wilt. Fruits of Tom Watson type but somewhat thicker and shorter; rind dark green, thin but tough; flesh bright red, of good texture and sweet flavor. 85 days.....	.25	.85	3.00
Winter Queen. Also called "Honey Dew." This is an exceptional melon for fine keeping quality; put in a cool place it keeps long into the winter and retains its delicious sweetness and flavor20	.65	2.00
Black Seeded Angeleno. The most attractive in appearance of all watermelons. Its large size, beautiful dark green rind with a tinge of gold showing through the green, no other variety compares with the Angeleno in its bright red flesh, red to the rind and entirely free from fibre.....	.20	.60	1.80
Kansas King. This is truly the king of all the water melons. It is large, averaging 28 to 30 pounds. No hollow center whether large or small. It is oval or round in shape; distinctly striped; rich red flesh, unexcelled in sweetness with tan colored seeds. 79 days.....	.20	.60	1.80

WATERMELONS (Cont.)

Kleckley's Sweet Watermelon

	Oz.	¼ Lb.	1 Lb.
Kleckley's Sweets—Wilt Resistant No. 6. Because of the thin brittle rind it is not suitable for shipping. Fruits large, oblong, very dark green; flesh bright, rich red, crisp, exceedingly sweet; seed white.....	.20	.60	1.80
California Honey. A vigorous vine growth and a good yielder. An early, medium size, quality melon. Fruit 8 to 9½ inches long by 7½ inches wide, solid dark green exterior, thin rind, solid red interior, good flavor, black seed. 73 days.....	.30	1.00	3.00
Northern Sweet. A fine new sort of Russian Origin sent out by the Minnesota Experiment Station. The melon is round with light green skin. Striped with darker green. The flesh is bright red, luscious and very sweet. Medium size. It is the earliest watermelon on the market today. This is the melon we have been looking for, for a long time on account of its fine flavor and is extremely early.....	.20	.60	1.80
King Gold. This is a very fine melon for the north. The first melon matured in 55 days and in a warm growing period this could be hastened another 5 days. The rind is light green in color, ½ inch thick, and very strong. It should be a good shipper, flesh is sweet, dark pink. The melons are very uniform and about 17 inches long, with a circumference of 18 inches.....	.45	1.40	4.25

WATERMELONS (Cont.)

	Oz.	¼ Lb.	1 Lb.
STRIPED Klondike. An excellent shipper and of wonderful quality. Light green, conspicuously striped with dark. In quality it has no superior and its striking appearance advertises it well wherever offered for sale. Small brown seeds. Flesh deep red. Very sweet. One of the best flavored melons we have ever tasted and it is early and grows to a large size. Weighs 25 to 30 pounds and it is an excellent keeper. .	\$0.20	\$0.60	\$1.80
New Klondike. A black seeded strain of Klondike considered one of the best early watermelons from a real quality standpoint. We know of no sweeter melon among the extra early types. The color is dark green—shape long. The flesh is deep red, fine texture and exceptionally crisp and tender. It is a good yielder and will prove to be a profitable market melon for the Northwest.....	.20	.60	1.80
Citron for Preserves. Medium-sized fruits used for preserves and pickling. Ripens in the fall and can be kept in good condition for a long time.....	.15	.45	1.35

MUSTARD

	Oz.	¼ lb.	1 Lb
Southern Giant Curled. Plant vigorous and hardy, of upright, spreading growth; leaves 5 inches long by 3 inches wide, light green, tinged yellow, much crumpled and frilled at the edges. The popular market variety in the South; seed small, dark reddish-brown	\$0.15	\$0.30	\$0.90
Chinese Smooth. A smooth or plain leaved variety which grows quickly and has a fine mild flavor.....	.15	.30	.90

OUR SEEDS ARE TESTED SEEDS

We test each lot for germination and mark the per cent which grows on each package. This service gives you a reliable guide as to just how thick to sow your seed in order to get a good stand.

SUPERIOR ONION SEED

Onion—Riverside Sweet Spanish No. 1; Early Yellow Globe No. 2; South Port Yellow Globe (Brigham Strain) No. 3.

Culture—Sow in rich, well drained soil early in the spring, and cover a half inch deep. When large enough, thin out to allow plenty of room for growth, as nice bulbs will not grow if crowded. An ounce will sow 200 feet of row; 6 pounds per acre.

WHITE VARIETIES

	Oz.	$\frac{1}{4}$ Lb.	1 Lb.
Southport White Globe. A large, globe-shaped onion; firm, fine grained, of mild flavor; keeps well. This is one of the handsomest onions grown, of beautiful shape, clear white skin, and commands the highest market price. Michigan grown. An excellent onion for bunching. 110 days.....	\$0.40	\$1.40	\$4.75
White Portugal. Also known as silverskin; the best for small white pickling onions, also extensively grown for white sets. 100 days.....	.40	1.25	4.00
White Sweet Spanish. A sport from Riverside Strain Sweet Spanish, which produces a very large half globe shaped white onion, of mild flavor, heavy yielder. The onions sell for top market prices.....	.50	1.60	5.75

RED VARIETIES

	Oz.	$\frac{1}{4}$ Lb.
Southport Red Globe. 130 days. A very desirable main crop, purplish red, globe shaped, with a very smooth glossy surface, a large producer and an excellent shipper and keeper. The most showy because highest color	\$0.45	\$1.50

ONIONS (Cont.)

YELLOW VARIETIES

	Oz.	¼ Lb.	1 Lb.
Early Yellow Globe. Positively the earliest yellow globe onion. This is our latest introduction, and it is a new variety, not merely another name for an old variety. This is a fine globe shaped onion with a beautiful yellow color. Further, it is a splendid winter keeper, and will stand storage better than most early sorts, as its skin is very thick.....	\$0.40	\$1.00	\$3.75
Downing Yellow Globe. Bulb round to globe shaped. It has a darker colored skin than Brigham Yellow Globe, and it seems to be an improvement as to keeping quality. Popular with some growers because it is uniform in shape, size and color, and a good keeper. 100 days.....	.40	1.10	4.00
Southport Yellow Globe (Brigham Strain). For thick skin and keeping qualities this variety has done especially well on peat and muck soils. The bulbs are deep globe shape, color is dark yellow or orange yellow. The skin is thick and there appears to be an extra layer. A very excellent storage variety40	1.00	3.75
Yellow Sweet Spanish (Utah Strain). For a popular priced Sweet Spanish of the regular type we offer this well known strain, very productive and adopted for growing in the big shipping sections and is a good keeper. Bulbs—large yellow globe shaped small neck which cures down well. Flesh white; fine grained; of mild flavor.....	.45	1.45	4.90
White Lisbon. Medium size bulb, round with thick neck, clear white skin; flesh white, juicy and of mild flavor. Grown almost exclusively as an early bunching onion.....	.40	1.25	4.50
Japanese or Ebenezer. A very fine round, yellow onion that will keep all winter and is of mild, pleasant flavor. The seed is used principally for raising sets, which when set out the following spring produce large, handsome, ripe onions in July40	1.10	3.90
Evergreen White Bunching. Does not form a bulb, but a pencil-like shaft like a Leek. Quite hardy for early spring and fall bunching onion. The onions are produced in clusters of 3 to 5. Are nearly twice the size of ordinary bunching onions and remain sweet a long time.....	.40	1.00	3.75

White and Ebenezers. Yellow.....At Lowest Market Prices

PARSNIPS

	Oz.	¼ Lb.	1 Lb.
White Model. Roots 10 inches long x 3½ inches thick at shoulder, tapers off more abruptly than Hollow Crown ; flesh white, tender and sweet. Free from side roots. 95 days	\$0.15	\$0.40	\$1.25
Improved Hollow Crown. The standard sort for home or market garden. Roots 12 inches long x 3 inches thick at the shoulder, tapering gradually to the tip, quite smooth, flesh white and tender. Hardy, vigorous, and good quality. 95 days	.15	.40	1.25

PARSLEY

Culture—Sow in early spring in drills 14 inches apart, ½ inch deep. Parsley requires from 20 to 30 days to show above the ground, therefore it is advisable to sow a few radishes or lettuce seeds with the parsley seed as a guide for early cultivation.

	Oz.	¼ Lb.	1 Lb.
Champion Moss Curled. The leaves are large and beautifully curled and of a very dark green.....	\$0.15	\$0.40	\$1.25
Paramount. Triple Curl, very uniform plants. 12 inches tall..	.15	.40	1.25
Hamburg Rooted. The root resembles a small parsnip and is the edible part of this sort; extensively used for flavoring soups	.15	.40	1.25

PUMPKINS

	Oz.	¼ Lb.	1 Lb.
Sugar or New England Pie. For making pies this variety cannot be excelled. The pumpkins are small, but very sweet, fine grained and of the best quality. The skin is a deep orange and flesh rich yellow.....	\$0.15	\$0.40	\$1.35
Connecticut Field. An immensely productive, large, orange-colored field pumpkin, usually grown for stock feeding, but also making good pies. There is no variety that will do so well among the corn.....	.15	.40	1.35

HYBRID POP CORN

		1 Lb.	
South American. Produces yellow kernels much larger than other varieties. Pops to enormous size; flavor excellent....	\$0.65
Pop Corn Jap Hulless, Minhybrid 250. Very nice type, least smut damage of any of the Japanese Hulless plots. Good standing ability. Double the yield of common strains.....	.65

**Long Thick Red****PEPPERS**

Culture—Seed should be planted in hot bed or green house about March 10th to 20th. When plants are 3 in. high they should be transplanted to 2 or 3 in. apart until weather and soil conditions permit for outdoor planting. Then plant in rows 2½ feet apart and 18 inches apart in row. Cultivate same as tomatoes.

	Oz.	¼ Lb.	1 Lb.
Calwonder Early. An asgrow early strain of California wonder. Maturing a week to ten days earlier than others. Plant stocky and sturdy, vigorous, prolific; fruits 3- and 4-lobed. Very attractive, smooth, uniform, deep green changing to bright crimson at maturity; thick, sweet and mild. 69 days	\$0.65	\$2.00	\$7.50
Bull Nose. A large variation of Ruby King, with Chinese Giant blood. Similar in shape to Ruby King. Unusually productive. Mild in flavor, flesh thick, consequently a fine shipper	.65	2.00	7.50
Sunnybrook Pimento. The smooth fruits average 3 in. in diameter and 2 in. long and are produced in clusters of 4 or 5 on dwarf broad bushes. The peppers are of a rich attractive deep scarlet color.....	.75	2.10	7.50
Hungarian Yellow Pepper. Fruit very pungent, 5 to 6 in. in length, rather slender and tapering to a somewhat twisted point. Waxy canary yellow in color, turning crimson at maturity; very prolific; hot.....	.60	1.75	6.00
Long Thick Red. A hot pepper on the order of Cayenne, though much thicker with a thicker flesh. Early and very prolific. Pods pendant, 4½ in. long by 1¼ in. diameter at top, red and pungent. Popular in many markets; very early....	.80

Thomas Laxton

PEAS

Culture—Sow in earliest spring, in rows $2\frac{1}{2}$ to 4 feet apart, drilling the seed 1 to 2 in. deep. Smooth varieties may be sown earlier than wrinkled varieties. Peas for market are seldom bushed. In home gardens, the taller varieties may be sown in double rows 12 in. apart and supported with brush. One pound is enough for 100 feet of row; 2 bushels per acre.

EARLY AND EXTRA EARLY VARIETIES

	1 Lb.	14 Lbs.	56 Lbs.
Easy Money. A fine new pea, with vine about 24 in. It is easily 10 days earlier than Gradus, has a very dark green plump pod of large size, is a very good yielder, and an excellent shipper. 55 days.....	\$0.45	\$4.20	\$15.65
Thomas Laxton. One of the most popular market and home garden varieties. The vine is 30 inches high, the pods $3\frac{1}{2}$ inches long, dark green and attractive. Matures in about 60 days45	4.20	15.65
Little Marvel. A grand sort for the home garden, being a good cropper. Makes a good pod and a short vine. It has all the qualities found in any variety. 58 days.....	.45	4.20	15.65

PEAS (Cont.)

Progress No. 9

	1 Lb.	14 Lbs.	56 Lbs.
Progress No. 9. A market, shipping and home garden variety of great merit. Maturing in about 62 days, it grows a vine 18 to 20 inches high. The pods are dark green and about $4\frac{1}{2}$ inches long. Very sweet and fine flavor.....	\$0.45	\$4.20	\$15.65

LATE VARIETIES—75 Days

ASGROW No. 40. Resembles Telephone but 4 to 5 days earlier; unequalled in pod size, and exceptional in quality; resistant to Fusarium wilt. Bred particularly for shippers and market gardeners. Vines dark green, stocky and branching. Pods single and double, round, dark green, plump, pointed, curved at tip; contain 8 to 10 large succulent peas. Seeds large, wrinkled, green.....	.45	4.20	15.65
---	-----	------	-------

Wyoming Wonder. A late and extra large podded variety for main crop. Pods measure 5 to $6\frac{1}{2}$ inches long, are dark green and contain from 8 to 10 large extra sweet peas. Vine is 24 to 28 inches, and the pea matures in about 75 days45	4.20	15.65
---	-----	------	-------

RADISH

SELECTED SCARLET GLOBE

Early Scarlet Globe, Market Gardeners Strain, Medium Top.

Grown from carefully selected transplanted roots

RADISH (Cont.)

Culture—For early planting, radishes should be planted on high land, and seed from the larger tops should be used. Sow in rows 16 in. apart and when weather gets warmer, radishes should be planted on low land or muck soil and seed from the shorter tops should be used. In order to have fine radishes at all times they should be planted from 2 to 3 times a week—then you will have good radishes for the market every day. Later in the fall they should be planted on high land again and seed from the larger tops should be used.

Grown from carefully selected transplanted roots

	1 Lb.	10 Lbs.	100 Lbs.
Reselected Early Scarlet Globe. Short Top. Grown from carefully selected transplanted roots. A perfect strain—result of individual plant selection. Surprisingly uniform. Color, brightest scarlet. Shape perfect, well-rounded bottom with slender tap-root. Flesh pure white, crisp and of fine flavor.	\$0.80	\$7.75	\$75.00
Cherry Belle. 23 days. All America winner 1949. A very short topped Strain with round bright red roots. A fine variety for the commercial grower.....	.90	8.75	85.00
Cavalier. Bright Scarlet Globe. Special greenhouse stock. Short top transplanted. We have offered a special greenhouse stock of scarlet globe radish a few years ago which has made many friends. We now offer an improved stock of this type in addition to an earlier maturity. This strain is much improved in color which is a rich brilliant scarlet approaching the saxa-color. Its main advantage is the unsurpassed quality90	8.50	80.00
Early Scarlet Globe, Market Gardener's Strain. Our selection from the Vick's Scarlet Globe. This strain is globe shape, exceptionally fine bright scarlet color. This stock starts fast and bulbs 2 to 3 days earlier than other stocks that we know of. Tops are medium short. We consider this an outstanding strain of Scarlet Globe. For early and late planting	.80	7.75	75.00
Sparkler White Tipped. Is round shaped with scarlet tops and the lower half clear white, of good quality.....	.80	7.50
White Icicle. White Icicle is the finest of all the long varieties and is claimed to be the finest of all radishes. The roots are crisp and tender, even when fully developed, and they have an agreeable snappy flavor. The roots grow to good size, 5 in. long, and are the shape of an icicle. They are straight and free from any side roots.....	.80	7.50

WINTER VARIETIES

Round Black Spanish. The roots are round, sometimes slightly top shaped, 3 or 4 in. in diameter. The skin is almost black. The flesh is white, very compact, decidedly pungent, but well flavored. The variety keeps well through the winter	.90

New Long Standing Bloomsdale

SPINACH

Sow the seed in good, rich ground free from acid, 1 inch deep, in rows a foot apart. The fast bolting or quick growing types may be sown very early in the spring or from August 15 until frost. The slow bolting types may be sown during the season when it is impractical to sow the early types. An ounce will sow 100 feet. Matures in from 45 to 55 days.

1 Lb. 10 Lbs.

America. A very long standing Bloomsdale type. Plant is vigorous, spreading and uniform, with thick, dark green glossy leaves. Rounded and heavily savoyed. 21 days.

New Long Standing Bloomsdale. This improved strain of Norfolk or Bloomsdale Savoy Spinach is a wonderful improvement over the old variety. It not only grows larger but stands ten days to two weeks longer without bolting. The leaves are very large, thick and heavy, deep green and very much crumpled and of the best quality. On account of the large size of the leaves it will yield twice as much as the older kinds \$0.60 \$4.75

Blight Resistant Savoy. For fall sowing. True Virginia strain. We offer the true Virginia strain of this spinach which is almost 100% resistant to blight. In addition the quality has been greatly improved so that the plants are uniformly well "crumpled or blistered" and the color a beautiful dark green. This strain can be depended on to produce large crops of fine spinach in the fall where other varieties will blight and fail60 4.75

RUBBER BANDS

Rubber bands for bunching will be obtainable in sizes No. 10, 12, 14 and 16. Also, utility bands No. 5 for large bunches of beets and carrots.

Turnips and Rutabagas—Early Snowball No. 1; Purple Top White Globe No. 2; Improved Long Island No. 3; Neckless (New) No. 4.

RUTABAGAS or SWEDISH TURNIPS

	Oz.	¼ Lb.	1 Lb.
Laurentian. Roots 5 to 5½ inches in diameter, globe-shaped, skin buff, dark purplish-red above the ground, flesh very light yellow, fine grained and excellent flavor. Very little neck20	.50	1.35
American Purple Top. The leaves grow out directly from the bulb, are very short and without the “necky” growth, is also very early.....	.15	.45	1.25

	Oz.	¼ Lb.	1 Lb.
Snowball, Early. Quick-growing, round, pure white and early, with medium-sized, smooth, and sweetly flavored roots, and short, scant top. Flesh pure white, fine-grained, and tender	\$0.10	\$0.30	\$0.85
Purple Top White Globe. Our re-selected strain is well suited for market gardeners, being true globe shaped, about half purple topped with small necks.....	.10	.30	.85

Select Hubbard

SQUASH

One ounce will sow 25 hills; 3 pounds an acre

The Squash is best cultivated in good, rich soil. Being a tender vine and very sensitive to cold, the seed should not be sown until the weather is warm and settled. Plant in hills which have been previously prepared by mixing a plentiful supply of fertilizer into the soil. The hills for bush varieties should be 4 feet apart each way and 8 feet apart for the trailing-vine varieties. Six to eight seeds may be used to a hill, and thin out to two of the strongest plants when they have grown their third leaf. A spraying with arsenate of lead solution when the young plants appear above ground will protect them from the attack of insects.

	Oz.	¼ Lb.	1 Lb.
SELECT HUBBARD. This is the strain that Mr. Frank Dunning worked on for years and selected to get a real Warted Hubbard and he always took the first prize wherever he had them on exhibit. They grow to a large size, thick heavy meat. Weigh 25 to 30 pounds each and keep a nice green color and does not turn brown like some Squash do	\$0.20	\$0.60	\$2.00

Delicious. The standard of excellence in winter squashes. Fruits broad top-shaped, commonly 7-8 in. long; skin very dark green, fairly smooth; rind thin but hard; flesh extremely thick, bright yellow, fine grained and dry, without fibre and of highest quality.....	.15	.50	1.50
---	-----	-----	------

Select Blue Hubbard

SQUASH (Cont.)

	Oz.	¼ Lb.	1 Lb.
SELECT BLUE HUBBARD (Very Special). This is the true strain of the old favorite variety, and distinguished from the ordinary by its uniformity of shape, which includes prominent, rounded "necks" at both ends, giving the fruit an elongated shape	\$0.25	\$0.60	\$2.25
Blue Hubbard (New England Strain). A superior strain of Blue Hubbard developed in the New England States with larger, longer fruits. Good keeper, excellent quality. Fruit 20 to 30 inches long x 12 to 14 inches at bulge.....	.25	0.60	2.25
Early Yellow Prolific. This is a grand dwarf summer squash and a distinct triumph in plant breeding. The squash are very attractive, smaller than the old straight neck, smooth, straight and a beautiful clear yellow. There is not a trace of green even in the very young fruit. The vine is dwarf, and extremely prolific and early.....	.20	.50	1.75
Improved Table Queen. For years one of the best Minneapolis market gardeners has worked up a strain of Table Queen Squash that is again as large as the original Table Queen, and it is from a week to ten days earlier. We secured seed from him and have raised it so we know it is free from mixture. This will be a big seller on this market. They weigh from 2½-3 pounds each.....	.20	.50	1.75
Table Queen or Des Moines. A small acorn shaped individual squash. flesh yellow, skin deep green. Weighs about 1½ lbs. One of the most popular kinds for "individual" baking....	.20	.55	1.65
Golden Hubbard. Similar to Hubbard, except that it is smaller, matures earlier and is of an orange-red color, except for a bit of olive green on the blossom end.....	.20	.55	1.65

Squash—Butter Cup No. 1; Improved Table Queen No. 2; Table Queen No. 3; Sweet Potato Squash No. 4.

SQUASH (Cont.)

	Oz.	¼ Lb.	1 Lb.
Buttercup. Developed by Prof. A. F. Yeager of the North Dakota Experiment Station. The thick orange yellow flesh cooks as dry as a good sweet potato and is sweeter and finer flavored than any other kind we know of. The fruit is of medium size, weighs from 4 to 5 pounds. This is a winter squash and will keep a long time. Everyone who appreciates squash of high quality should try some of this kind.....	\$0.20	\$0.65	\$2.25
Sweet Potato. A valuable addition to the list of small squashes which are becoming so popular a feature of fall and winter menus. It is an improved Delicata, as sweet as Table Queen and of exceptionally fine flavor. The fruits average 6 to 8 in. long and they are thick fleshed. When baked and served with melted butter it is a table delicacy of the first order	.20	.60	2.00
Cocozelle (Italian Vegetable Marrow). A bush summer variety. Fruits oblong, ribbed, 12-16 in. in length. Color dark green marbled with yellow and dark green stripes. Very fine flavor	.15	.50	1.50
Banana. This squash grows from one to two feet in length. Flesh firm and solid of beautiful orange-yellow and excellent quality. It keeps from one season until another.....	.15	.50	1.50
Giant Summer Straightneck. A selection of summer squash with a straight neck instead of the usual crookneck. It grows about 18 to 20 in. in length, is very thick meated and has a beautiful orange color.....	.15	.50	1.50

SALSIFY or OYSTER PLANT

Culture. Sow as early as the ground can be worked, in drills 12 to 15 in. apart, 1 in. deep. One ounce to 100 feet of drill. About 180 seeds to the packet.

Mammoth Sandwich Island Salsify. This is an improved type of Salsify and the best sort. The roots are double the size of the old long smooth variety, less likely to branch, and are of equally good quality and delicate flavor..... \$0.50 \$1.75

SELECTED TOMATO SEED

	Pk.	¼ Oz.	½ Oz.
Minnetonka, Hybrid (F1). Of mid-season maturity, vigorous vine, strong and very prolific. Fruits deep scarlet red, large, deep globe-shaped, solid, free from cracking and of excellent flavor and quality. Vines continue bearing well and outyield similar standard varieties by 15 to 25%	.50	8.00	15.00
Stokescross No. 4. 75 days to maturity after transplanting. An F-2 Hybrid. One of the greatest tomatoes ever introduced. Its hybrid vigor enables the plant to develop a heavy crop of 6 to 7 ounce fruit. It will develop full color right to the stem. Its interior structure will allow long distance shipping. It is noted for its delicate sweet flavor.....	\$5.00
Stokescross No. 5. 82 days to maturity after transplanting. An F-2 Hybrid. This wonderful tomato has many points of similarity with Stokescross No. 4, but its heavier foliage is an added advantage under burning sun. The interior is very solid, making it satisfactory both as a long distance shipper and as a canner.....	5.00
Valiant. Certified Proving Ground Stock. 68 days to maturity after transplanting	5.00
Rutgers. Certified Proving Ground Stock. 85 days to maturity after transplanting	5.00
	Oz.	¼ Lb.	1 Lb.
STOKESDALE. Prolific, Medium Early. The fruit is of medium size, deep globe in shape, very smooth and seems to have very little cracking. They are very solid, and an excellent deep red color throughout. The vines are strong and very prolific	\$0.70	\$2.25	\$8.00
Valiant. Large very early fruit. This new early tomato has now taken the place of the old Earliana. It ripens a few days later than that variety, but the fruit is so much better looking and finer quality. The tomatoes are of good size, round and smooth, and color up to the stem much better than Earliana70	2.25	8.00

TOMATO (Cont.)

	Oz.	¼ Lb.	1 Lb.
John Baer Select. This tomato produces immense crops of large, smooth, handsome tomatoes. The vines are strong and vigorous. The fruit is large and produced in great clusters, and is early enough to ripen the whole crop before frost in a normal season.....	.70	2.25	8.00
Asgrow Scarlet Dawn. A cross of Clark's Early and Marglobe, earlier in season than either parent. Vines of medium growth, fairly open, very prolific. Fruits medium large with thick wall structure, globular, smooth, free from flat sides, bright scarlet ripening well to the stem.....	.70	2.25	8.00
Scarlet Self-Topper. Produces very beautiful, bright scarlet, globe-shaped fruits. The stem end fills out well and is free from cracks and radial lines. Meaty, solid and mild flavor. The last introduction of the late Mr. Prichard.....	.70	2.25	8.00
Firesteel. A very large fruited tomato, globe shaped and scarlet red in color. It is not affected by hot weather as much as other varieties and is very productive. The fruit is smooth, and very uniform; remarkably free from cracking at the stem end. Maturity 60 to 70 days.....	.70	2.25	8.00
Bonny Best. One of the standard early varieties, a little later in maturity than Earliana.....	.70	2.25	8.00
Dwarf Champion. We have an improved strain of this good pink "potato leaved" variety used mainly for plants.....	.80	2.25	7.50
Break O' Day. Wilt resistant and one of the best of the recent introductions by the United States Dept. of Agriculture..	.70	2.15	6.50
Ponderosa. Largest of all tomatoes. Single specimens often grow to weigh from 1½-2 lbs. Good flavor.....	.80	2.35	8.00
Rutgers Certified. For canning, the fruit being firm. Mild with excellent flavor and a very attractive deep red color. Try some Rutgers this year.....	.70	2.15	6.50
Yellow Plum. Fruits plum-shaped, of clear, deep yellow color; flesh yellow and finely flavored. Esteemed for preserves....	.80
Yellow Husk or Ground Cherry. Used for preserving and eating from the hand. The seed we offer is that of the true Yellow Ground Cherry80
Golden Dawn. Yellow. A very handsome new Asgrow introduction, similar in shape to Scarlet Dawn but of attractive golden yellow color of mild sub-acid flavor. 77 days.....	.75
Oxheart. The best extra large pink variety and fine for slicing. It is heart shaped and very late in maturing.....	1.20

VEGETABLE PLANTS AND ROOTS

RHUBARB OR PIEPLANT ROOTS

People are just beginning to realize the great profit in the culture of Rhubarb in the open field. It yields enormous profits. Anyone can succeed, as the culture is very simple. The roots we offer as division of large roots.

Ruby (the new red fleshed variety). An early, delicious variety from Canada. Produces ruby red sauce of low acidity so that little sugar is needed. Thin skin which need not be peeled, a heavy and long producer. Does not come true from seed so must be produced by division. Each.....\$0.35

VIGORO IS IDEAL FOR LAWNS, FLOWERS, SHRUBS, TREES, VEGETABLES!

HIGH GRADE FARM SEEDS

The Latest in Hybrid Corn

Here are hybrids you can depend on to come through in a big way when the bushels are counted in the fall of 1953. Each has been carefully tested under the conditions for which it is recommended. Each in its maturity class represents the latest breeding achievement resulting from one of the biggest and most intensive research and experimental programs in the entire hybrid seed corn industry. After making your selection, place your order quickly. Be first in line for the maturity and kernel grade you want.

STERLING LAWN SEED

For Those Who Want the Best

Contains three of the finest grasses for lawn purposes—Kentucky blue grass, red top and white clover. Dwarf, evergreen, fibrous-rooted grasses in proper proportion to produce a dense, fine texture turf of beautiful shade and long life. We recommend it as the most economical and satisfactory mixture. Put up in 1 lb. cartons; also in cotton bags, 5, 10, 25, 50, 100 lbs.

1 Lb. \$1.15 5 Lbs. \$5.50

GRASS SEED FOR SHADY LAWNS

This mixture is composed of the few kinds of grasses that grow best in shady places. These grasses will grow and make a good sod under trees and in the shade of buildings where the common kinds of lawn grass would not do well.

This seed should be sown in the early spring or fall. The ground should be thoroughly stirred up and raked smooth before seeding. Use seed at the same rate as common Lawn grass.

Put up in 1 pound package. Price.....\$1.25

CREEPING BENT

Put up in 1 pound bags. Price.....\$1.40

QUANTITY TO USE

On new lawns, use 1 pound for every 300 square feet; 5 pounds for 1,500 square feet; 135 to 145 pounds for one acre. To replenish lawns where turf is thin use half quantity.

NORTHLAND BRAND

HIGH GRADE FARM SEEDS

Lb. 60 Lbs.

Alfalfa Grimm's. The best of the alfalfas and recommended very highly. The price of this is usually high but it repays you. Resists the hard winters and is a heavy producer.....

Alfalfa—Minnesota Grown. An excellent grade and quite hardy, being well adapted to the Northwest.....

Medium Red Clover. This is the recognized standard of the clover family. It produces two crops each year. The first is generally harvested for hay when in full bloom. The second crop may be harvested for seed, cut for hay, or plowed under the fertilizer.....

Alsike Clover. Grows well on low, wet land where Red Clover does not thrive. For heavy or wet land it is a good plan to mix Alsike and Red Clover, using about half of each. Alsike being a perennial will last for a good many years, either for hay or in pasture.....

Sweet Clover. This variety is most generally referred to when sweet clover is mentioned. It lives for two years only, but will reseed itself if allowed to mature. Sweet clover will grow well on most any kind of soil, and will improve the soil for future crops.....

White or Dutch Clover. A low close growing clover, with round white heads. Very fragrant and desirable for beautifying the lawn. It will stand close cutting and very rapidly throws up an abundance of leaves and blossoms. It is usually better to sow with other grasses. Does well on most any soil.....\$1.15

Lb. 45 Lbs.

Timothy. This crop is cut for hay; probably surpasses any other grass in cultivation; it thrives best on moist, loamy soils, and is not well suited to light, sandy or gravelly soils, it should be cut just when the blossom falls.....

Red Top. Valuable for most soils. Good permanent grass; stands our climate well; is adapted to our pastures; has succeeded on alkali soil when other grasses failed. Fancy clean or hulled seed; sow 8 to 10 pounds per acre.....

Kentucky Blue Grass. Will outlive any other grasses for pasture or lawn, but should not be cut or pastured too closely in extremely hot, dry weather. The seed is very slow in germinating, therefore, it is advisable to plant with other varieties of quicker growing habits. Makes a sweet and nutritious pasture for all stock.....

Sudan Grass. Sow early in May, and the crop should be ready for the first cutting in July. Broadcast 18 to 25 pounds per acre.....\$1.30

In regards to Farm Seeds, the price may change before spring time. It may go higher and it may go lower. So I would advise that you write for prices before you place your order.

FARM SEEDS (Cont.)

GRASSES

Bromus Inermis. Drought defying, frost resisting. Yields enormous crops of splendid hay and affords early and abundant pasturage. It starts from two to three weeks earlier in the spring than native prairie grass and it keeps green in the autumn longer than most of the useful grasses grown in the West. 15 pounds of good Bromus Inermis seed per acre is sufficient.....

BUCKWHEAT

Japanese. Will produce a larger growth and will stand dry weather better than any other variety. The kernel is large, dark brown and matures very early. As much as 40 bushels to the acre have been harvested of this variety, making it very profitable to raise.....

Millet Siberian. Valuable annual hay and fodder crop, more productive and larger than Hungarian, but is later and not so quick growing. Height from 3 to 5 feet. 48 pounds per bushel.....

RAPE

Dwarf Essex. Rape is one of the surest crops for late pasturing. The leaf resembles the rutabaga very much, but will produce a heavier growth, that is relished by hogs, sheep and cattle. It may be sown as late as July 1st, and produce a very fine fall pasture

SUNFLOWER

Mammoth Russian. May be grown to great advantage in waste ground. An excellent and cheap food for fowls. All farmers should plant this, if only for feeding chickens. It is enormously productive of seed, as the heads sometimes measure 18 inches in diameter. Plant 4 quarts to acre.....Pkt. 5c; 1 Lb. 25c

SOY BEANS

Manchu. A medium early yellow variety with black eye on the seed. Somewhat stockier and larger than Ito San and preferred for ensilage and grain. The most popular variety at the present time in Iowa, Minnesota, Wisconsin and South DakotaWrite for Prices

FIELD PEAS

Marrowfat Peas, Yellow. Height of vine 3½ to 4 ft. This variety is extensively grown in Canada, Wisconsin and other pea growing sections, and has a large sale, not only for agricultural purposes, but for use in soups.....

Reed Canary Grass, or Phalaris. It thrives in locations where the water level is practically at the surface of the soil all the time and above the surface part of the time. No other forage crop, the seed of which is available in quantity, will thrive so well on highly productive lands that are too wet for most other crops. Broadcast 4 to 6 pounds per acre.....Write for Prices

FARM SEEDS (Cont.)

FODDER CORN

Giant Fodder Corn. This is a very tall growing leafy variety of southern white corn. A very heavy yielder, often producing from 10 to 25 tons of green feed per acre. We recommend sowing this corn very thick in order to prevent stocks from becoming too large and coarse. From one to two bushels per acre by drills may be sown with very good results.

Elephant Fodder. Of the yellow dent type, but grows taller and more leafy than the average yellow dent corn, therefore producing a very heavy yield.

Write for Prices

FIELD BEANS

Choice Navy. Our stock of this well known variety has been carefully selected and cleaned and will be found superior to beans commonly offered as "Navy Stock."

Brown or Swedish. There is a large call for these beans and although we have given them small space, have sold large quantities. It is a fine field variety and the demand is usually good and the price high. The beans are brown in color, medium size and excellent for cooking.

Write for Prices

SUGAR CANE OR SORGHUM

Our customers are constantly increasing their sowings of this cheap and exceedingly useful summer fodder for all stock and especially milch cows. Every farmer, small or large, should make sowings of it.....

Semesan. The universal seed disinfectant and plant stimulant, important for control of damping off of seedlings, Gladioli, and disinfection of seed bed soil.

GENERAL LIST OF RELIABLE FLOWER SEED

Aster

Helichrysum (Strawflower)

In presenting our Flower Seed list we have not listed any varieties which will not thrive in an open garden. All varieties listed, if given the proper care, should produce satisfactory results, and although our list is not as large as that found in some other catalogs, we think it comprises the best varieties for general purposes.

Good News for Gardeners

FROM THE MAKERS OF **VIGORO**

EndoPest

3-Way Pest Control

In 1923, Swift & Company introduced Vigoro, which revolutionized garden feeding. Now Swift introduces a simplified garden pest control program with EndoPest . . . ALL THE PROTECTION MOST GARDENS NEED! EndoPest can be used with confidence on edible fruits and vegetables, as well as flowers and shrubbery, for control of most chewing and sucking insects and fungus diseases. It's so easy to use you'll want to dust regularly . . . stop trouble before it starts. We have handy refill cartridges for EndoPest dust gun applicators.

EndoWeed

Improved Weed Killer

EndoWeed, new, improved selective weed killer, dooms weeds to death—roots and all! One application penetrates the entire plant. Kills leaves, stems, roots—yet won't harm ordinary grass nor affect the soil. EndoWeed kills dandelions, chickweed, plantain and over 50 other weeds. Available in sizes from half pint to gallon, and in packets for small-area spraying, 8 ounces of EndoWeed treats 2000 sq. ft. of lawn. And remember—you can give your grass a new lease on life by applying Vigoro several days after the EndoWeed spraying!

Planet Jr. No. 13

COMBINED DOUBLE AND SINGLE WHEEL HOE

The No. 13 is the market garden-
er's favorite cultivator as the hoes
are the most useful attachment.
They get all the weeds and leave a
moisture retaining mulch. Due to
the high shields on the hoes it is
possible to do close, accurate work
rapidly, leaving little or no hand
weeding.

The Planet Jr.

THE BP-1 MODEL

Ranking far above any tractor in its
class, is the efficient, sturdy and versatile
Model BP-1, equipped with a 1½ H.P.
motor. The operating power of this tractor
is surprising to all who have seen what
it can do.

Here's the plant food for *Grass!*

Vigoro, complete plant food, helps grass plants develop sturdy, deep-growing roots and fine, thick top growth that stands up well.

You'll be pleased with the new beauty Vigoro can bring to your entire garden . . . try Vigoro for everything you grow . . . lawns, flowers, shrubs, trees!

Vigoro is clean, odorless, sanitary and easy to use . . . economical, too, you only need 4 pounds per 100 square feet. Include Vigoro on your seed order.
